

Anudeep Bommidi

Software Engineer (Full Stack)

I am a full-stack developer versed in Java and Javascript with experience developing, maintaining scalable web applications.

EXPERIENCE

Advance Auto Parts, Hyderabad — Software Developer II

MARCH 2021 - PRESENT

- Helped convert a B2B e-commerce site written in JavaScript/JSP into a responsive website using the tech stack React, Typescript & Storybook.

Kony India Pvt. Ltd, Hyderabad — Senior Software Development Engineer

JUNE 2019 - MARCH 2021

- Contributed majorly on a Business Workflow Webapp:
 - Developed a micro frontend in React within a parent AngularJS application, established communication via Redux, and event mechanism.
 - Developed graph algorithms to support validations and persistence in the workflow designer.
 - Built a BPMN backend parser that translates the GoJS designer data model into BPMN standard XML.
- Designed and built a Java command-line application that when provided with a JSON rules file and a packaged application file(App), augments the App with lock configurations.
- Led a team of 4, planned and executed the conversion of legacy code written in AngularJS into React and Redux.
- Introduced Typescript and, also improved frontend code to be more flexible and modular by utilising composition patterns.

Kony India Pvt. Ltd, Hyderabad — Software Development Engineer

JULY 2017 - APRIL 2019

- Enhanced API designer UX by simplifying the data extraction for JSON and XML data formats. This was done by providing auto generation capability for JSON/XML paths from a visual tree interface.
- Did website profiling, figured out several performance bottlenecks, and improved the web application performance.
- Upgraded frontend from Webpack 3 to Webpack 4. As a part of this, I published a Webpack plugin to NPM named *webpack-script-tags-plugin*.

EDUCATION

University of Kansas, Lawrence, KS, USA — Master's in Computer Science

AUG 2015 - JAN 2016 (DISCONTINUED)

GITAM University, Visakhapatnam, IN — B.Tech in Computer Science

JUNE 2011 - APRIL 2015

Graduated First Class with 7.82 GPA

PROJECTS

Personally, I have experience developing MEAN/MERN stack web applications with JWT authentication.

Hyderabad,
Telangana, INDIA 500075
(798) 9036267

SKILLS

Programming:

- Javascript, Java, Python, Typescript

Frontend:

- React, AngularJS
- Redux, HTML, CSS, Webpack

Backend:

- NodeJS, Express, MySQL
- Spring, Hibernate

CERTIFICATIONS

University of California, San Diego on Coursera:

- Data Structures & Performance - [certificate](#)
- Advanced Data Structures in Java - [certificate](#)
- Algorithmic Toolbox - [certificate](#)
- Data Structures - [certificate](#)
- Algorithms on Graphs - [certificate](#)
- OOP In Java - [certificate](#)

ACCOMPLISHMENTS

- Recipient of Extra Miler award at Kony India Pvt Ltd for delivering project with highest standards.
- Recipient of Spot Award for mentoring associates.
- AMCAT Topper (99.3% in Computer Programming)

LANGUAGES

English, Telugu, Hindi

HOBBIES

Chess, Reading, Writing, Badminton
