

Anudeep Bommidi

Software Engineer (Full Stack)

I am a self-learner and have made coding a part of my life. I regularly strive for perfection, ever learning and ever exploring new phases/aspects that come along. Despite being a front-end focussed developer, I have excellent knowledge of core computer science fundamentals, algorithmic design, and data structures.

EXPERIENCE

Advance Auto Parts, Hyderabad — Software Developer II

MARCH 2021 - PRESENT

- Helped bring an intricate e-commerce site written in JavaScript/JSP to become a responsive website using the tech stack React, Typescript, Storybook, etc.

Kony India Pvt. Ltd, Hyderabad — Senior Software Development Engineer

JUNE 2019 - MARCH 2021

- Designed, developed a comprehensive Business Workflow Management Project based on BPMN standards in React-Redux and GoJS. As a part of this, developed Graph algorithms and helped translate the workflow JSON into an XML. On the same project, I contributed majorly in the backend as well, written in Spring.
- Led a team of 4, planned and executed the conversion of legacy code written in AngularJS into React and Redux.
- Designed and built an end-to-end feature that involves a Java command-line application that when provided with a JSON rules file and a packaged application file(App), augments the App with CRUD configurations.
- Upgraded a massive project from Webpack 3 to Webpack 4. As a part of this, I published a Webpack plugin to NPM named *webpack-script-tags-plugin*.

Kony India Pvt. Ltd, Hyderabad — Software Development Engineer

JULY 2017 - APRIL 2019

- As an SDE, developed, collaborated on several full-stack features comprising languages & technologies viz. Javascript(ES6+), AngularJS(1.6), React 16, React Hooks, Java, Spring, Hibernate, etc.
- Partnered on integrating code mirror into a NodeJS application and collaborated on a custom intellisense plugin (Tern) for the code editor.
- Did website profiling, figured out several performance bottlenecks, and improved the web application performance.

EDUCATION

University of Kansas, Lawrence, KS, USA — Master's in Computer Science

AUG 2015 - JAN 2016 (DISCONTINUED)

GITAM University, Visakhapatnam, IN — B.Tech in Computer Science

JUNE 2011 - APRIL 2015

Graduated First Class with 7.82 GPA

PROJECTS

I have developed several full-stack web applications and have complete end-to-end experience building, deploying applications.

Hyderabad,
Telangana, INDIA 500075

SKILLS

Excellent:

- Javascript, Java
- React, AngularJS(1.8), Typescript
- NodeJS, Redux, HTML5, CSS3, Bootstrap
- Webpack, Git

Competent:

- Express, MySQL, Python
- Spring, Hibernate, JPA

CERTIFICATIONS

University of California, San Diego on Coursera:

- Data Structures & Performance - [certificate](#)
- Advanced Data Structures in Java - [certificate](#)
- Algorithmic Toolbox - [certificate](#)
- Data Structures - [certificate](#)
- Algorithms on Graphs - [certificate](#)
- OOP In Java - [certificate](#)

ACCOMPLISHMENTS

- Recipient of Extra Miler award at Kony India Pvt Ltd for delivering project with highest standards.
- Recipient of Spot Award for mentoring associates.
- AMCAT Topper (99.3% in Computer Programming)

LANGUAGES

English, Telugu, Hindi
